then click on Enter

## PouchDB Test

AddCancel

First Name	Last Name	Email
------------	-----------	-------

Fidelis	Ololube	fn_ololube@yahoo.com
---------	---------	----------------------

Edit

Del

Now the app appears,

- you can fill in the field and click on “Add” button to add the record to the pouchdb.
- Click the “Cancel” button to clear the fields.
- Click the “Del” button to delete the record form the pouchdb  
and
- Click on the “Edit” button to edit the record. Although for some reason the Edit button requires you to click 2 times, if suspect that the pouchDB.get( ), is kind of slow or requires additional refresh.
